

 **AURACAST**
A BLUETOOTH® TECHNOLOGY

Hearing Assistance Program

In 2026, Good Shepherd upgraded its sound system within the sanctuary to include a broadcast called Auracast™. Auracast™ enables individuals who are hard of hearing or are living with more profound hearing loss to access the audio feed from the sound system directly into Auracast™ capable hearing aids, headphones or earbuds on a 2 bring-your-own-device (BYOD) basis. For congregants with hearing aids with activated T-Coils, neck-loops with Auracast™ receivers are available upon request.
